MANAGEMENT OF PERIOPERATIVE BLEEDING
Factor Concentrates vs Allogenic Blood Products Pros and Cons

- Key Decisions in a Goal-Directed Coagulation Management Approach
- Evidence for Using First-Line Coagulation Factor Concentrates for Trauma-Induced Coagulopathy
- Implementation of a Revised Trauma Management Protocol

SUNDAY, JUNE 3, 2018
12:15 – 13:45 | ROOM: AUDITORIUM 15

In this symposium, leading experts on coagulation management will discuss when and how to use factor concentrates to control coagulopathy.

Chair
Donat R. Spahn, MD

Faculty
Dietmar Fries, MD
Petra Innerhofer, MD

This activity is intended for global ex-US anesthesiologists, emergency medicine physicians, critical-care physicians, cardiologists, and other healthcare providers treating patients with coagulopathy-associated perioperative bleeding

This educational activity is supported by independent educational grant from CSL Behring
